Per Level Dmg Hots

Due to the integral role of each hormone, it's no surprise that a slight imbalance of one hormone could be the catalyst of your nagging headache, unpredictable mood swings, increased sweating or weight gain.. 5? Second cast time. This is why druids use rank 4 healing touch and not rank 1 or something like that.. The endocrine system secretes 50 different hormones throughout your body and each plays a vital role in maintaining homeostasis, or stable body functions.. It is a lvl 20 spell that gets proper benefit from +healing items as per it's 2.. Cast time reductions do not affect this calculation and furthermore, there is also a major reduction if +dmg/healing benefits on spell ranks below level 20.
